

CURRICULUM VITAE
KENNETH ALLEN JOHNSON
Roger Williams Centennial Professor of Biochemistry
Institute for Cellular and Molecular Biology
Department of Chemistry & Biochemistry
2500 Speedway, A4800, MBB 3.122
University of Texas at Austin
Austin, Texas 78712

ACADEMIC TRAINING

University of Iowa	BS	1971	Chemistry, with highest honors and with highest distinction.
University of Wisconsin	Ph.D.	1975	Molecular Biology. Advisor: Dr. Gary Borisy Thesis Title: The Mechanism of Microtubule Assembly
University of Chicago	Postdoc		With Edwin W. Taylor

OCCUPATIONAL RECORD

1998 - present	Roger Williams Centennial Professor , Institute for Cellular and Molecular Biology, Dept. of Chemistry & Biochemistry, University of Texas at Austin, Austin, TX
1987-1998	Paul Berg Professor of Biochemistry Department of Biochemistry and Molecular Biology, The Pennsylvania State University, University Park, PA
1984-1987	Associate Professor , Department of Molecular and Cell Biology, The Pennsylvania State University, University Park, PA
1979-1984	Assistant Professor , Department of Biochemistry and Biophysics, The Pennsylvania State University, University Park, PA
1975-1979	Postdoctoral Fellow , Department of Biophysics and Theoretical Biology, The University of Chicago, Chicago, IL (with Dr. Edwin W. Taylor)

HONORS AND AWARDS

2012	Vincent du Vigneaud Honorary Lectureship, University of Rochester
2007	Fellow of the American Association for the Advancement of Science
2000	Joseph Coleman Memorial Lecturer, Yale University, October 30, 2000
1998	Roger Williams Professorship, University of Texas at Austin
1989	Pfizer Award in Enzyme Chemistry, American Chemical Society
1987	Paul Berg Professorship, Pennsylvania State University
1987	Penn State Faculty Scholar Medal for Life and Medical Sciences
1983-1988	American Heart Association Established Investigatorship
1979	Muscular Dystrophy Association Postdoctoral Fellowship
1976-1979	National Institutes of Health Postdoctoral Fellowship
1971	Phi Beta Kappa
1971	Chemistry Faculty Undergraduate Scholar Award
1967-1971	Thomas Dooley Memorial Scholarship

COMMITTEES

National and International Committees

2001-2006	Member of Editorial Board of the Journal of Biological Chemistry
1996-2004	External reviewer for DFG Priority Program on Molecular Motors (Germany)
1998	Ad Hoc member of AIDS Study Section, National Institutes of Health
1997	Program Chair, Biological Division of American Chemical Society
1996	Chair, Gordon Conference on Biopolymers
1989-1998	Brookhaven STEM/NIH Advisory Committee
1992	Chair, Gordon Conference on Enzymes, Coenzymes & Metabolic Pathways
1987-1988	American Heart Association Grant Review Panel
1986-1991	Member of Cell Biology Study Section, National Institutes of Health
1986	Review Panel for the New Jersey Dept. of Higher Education
1985-1988	Monitoring Editor for the Journal of Cell Biology
1983	Organizing committee for the Cytoplasmic Matrix Conference
1983	Ad Hoc member of Cell Biology Study Section, NIH

University Committees

2007-2010	Member, Advisory Board of Institute for Cellular & Molecular Biology
2006-2008	Department of Chemistry and Biochemistry Promotion and Tenure Committee
2006-2008	College Science Promotion and Tenure Committee
2005	College Committee for MGM Department research space assignment
2004	Chair, College Review of Organized Research Units
2004	Chair, Review of Waggoner Alcohol Addiction Center
1999-2004	Institute for Cell & Molecular Biology Advisory Committee
1999-2003	Coordinator for Biochemistry Division of Chemistry & Biochemistry Dept.
2002	Chair, Chemistry & Biochemistry Search Committee
2001	Chair, Chemistry & Biochemistry Search Committee
1999	Chair, Chemistry & Biochemistry Search Committee
1996	College of Science Promotion and Tenure Committee
1994-1996	Departmental Promotion and Tenure Committee
1994-1998	Endowed Faculty Search Committee
1993-1996	Faculty Search Committee, Chairman
1992	Endowed Faculty Position Search Committee, Chairman
1991	Faculty Search Committee
1990	Graduate Student Search Committee, Chairman
1989	College of Science Promotion and Tenure Committee
1988-1989	Departmental Nominations Committee, Chairman
1987-1989	Departmental Headship Search Committee, Chairman
1987-1989	College of Science Dean Search Committee
1987	Departmental Graduate Candidacy, Chairman

1987	Departmental Promotion and Tenure Committee, Chairman
1986	Biochemistry Program Graduate Candidacy, Chairman
1985-1986	Graduate Student Admissions
1985-1986	Faculty Search Committee
1980-1983	Graduate Student Admissions

CONSULTING ACTIVITIES

2011-present	Consultant, Novartis Vaccines & Diagnostics, Emeryville, CA
2008-present	Consultant, Roche Pharmaceuticals, Palo Alto, CA and Nutley, NJ
2007-present	Member of Scientific Advisory Board of Pacific Biosciences
2007	Fish & Richardson – Expert witness for patent lawsuit on reverse transcriptase.
2005-present	Consultant for Pacific Biosciences
2005	Drinkler Biddle & Reath – expert witness on lawsuit relating to the toxicity of AZT in treating AIDS.
2004	Fish & Richardson – expert witness on patent infringement lawsuit involving use of polymerases in PCR
1987-present	President, KinTek Corporation, State College, PA
2003-2004	Consultant for Applied Biosystems Group, Applied Corp
1994-2001	Consultant for Applied Biosystems Division, Perkin Elmer Corporation, Foster City, CA
1999-2001	Consultant for Schering-Plough
1996-1997	Expert witness for PCR patent law for Finnegan, Henderson, Farabow, Garrett & Dunner, Washington, DC
1987-1990	Consultant for Monsanto Agricultural Co., St. Louis, MO

PATENT APPLICATIONS

2007	Portable, temperature and chemically inducible expression vector for high cell density expression of heterologous genes in E. coli.
2004	<ol style="list-style-type: none"> 1. “Use of the human mitochondrial DNA polymerase for single molecule DNA sequencing” 2. “Use of dye-linked chain terminators for single molecule DNA sequencing” 3. “A unique reverse transcriptase capable of longer and more accurate cDNA transcripts” 4. “Site specifically labeled DNA polymerase to measure nucleotide binding and incorporation”
1990	Exonuclease deficient mutant of T7 DNA polymerase.

RESEARCH INTERESTS

Research in the Johnson Lab is supported by three NIH research grants focused on three different areas. The projects are linked by the common thread of using transient kinetic methods to examine enzyme reaction pathways and to relate our functional analysis to structure.

Elementary steps in DNA replication. In these studies we use a model DNA polymerase from T7 bacteriophage which replicates DNA with high speed and fidelity, but is small enough to enable rigorous structure/function analysis. In recent work using a fluorescently labeled enzyme we discovered a new paradigm for DNA polymerase selectivity in which the substrate dissociation rate is a critical parameter. A correct nucleotide induces a rapid conformational change that organizes active site residues to promote catalysis. Following the conformational change, the substrate is committed to continue the forward reaction because the substrate release rate is so slow; therefore, the rate the chemistry step does not contribute to k_{cat}/K_m . In contrast, a mismatched nucleotide induces a different conformational state in which active site residues appear to be disorganized while the rate of substrate release is fast, promoting dissociation rather than incorporation. Thus, the conformational change acts as a molecular switch to distinguish correct from incorrect substrates.

HIV Reverse Transcriptase mechanism, fidelity, inhibition and drug resistance. In previous work we have established the elementary steps leading to correct nucleotide incorporation by HIV reverse transcriptase and have quantified the changes in individual kinetic constants occurring during misincorporation. In addition, we have determined the mechanism of action of a class of nonnucleoside inhibitors and characterized changes leading to resistance against these agents. In current work, we are continuing to explore the mechanisms of multiple drug resistance and examine the phenomenon of reciprocal drug resistance where, for example, resistance to AZT and ddI appears to be mutually exclusive in some instances. A better understanding of these phenomena at the structural and mechanistic level could lead to the development of better combination therapies in the treatment of AIDS.

Mitochondrial DNA Polymerase mechanism, fidelity and inhibition by nucleoside analogs. Several studies point to the likely role of the mitochondrial DNA polymerase in the toxicity of nucleoside analogs used in the treatment of viral infections such as hepatitis and AIDS. We have established that the toxicity of nucleoside analogs is correlated with their incorporation into mitochondrial DNA by the mitochondrial polymerase, spanning six orders of magnitude. Recently we have succeeded in obtaining a crystal structure of this large and complex enzyme in collaboration with Dr. Whitney Yin. This opens the way for more detailed structure/function studies.

Microtubule-Dependent Motor ATPase Mechanism and Force Production. We have established the pathway of ATP hydrolysis by kinesin, a motor protein involved in fast axonal transport. The protein is a dimer and shows an alternating site ATPase mechanism that is coupled to the movement of the kinesin along the surface of the microtubule. In current work we are examining the kinetic and structural basis for this alternating site activity in order to establish the mechanism of force production. The work serves as an important model for understanding energy transduction in general, and for exploring the family of kinesin-like ATPases that are responsible for a wide range of microtubule-dependent movements in all eukaryotic cells.

CURRENT RESEARCH GRANT SUPPORT

2 R01 GM044613-18A1 (Johnson)

4/08/2008 to 1/31/2012

NIH/NIGMS

Mechanism of mitochondrial DNA replication

This project is to investigate the mechanism of DNA replication catalyzed by the human mitochondrial DNA polymerase and to investigate its role in the toxicity of nucleoside analogs used to treat HIV infections and in heritable diseases.

F-1604 (Johnson)

6/01/2008 to 5/31/2011

The Welch Foundation

HIV reverse transcriptase inhibitors and the treatment of AIDS

This grant provides seed money to develop new methods to examine the kinetic, structural and thermodynamic basis for nucleotide selectivity by HIV reverse transcriptase.

2 R01 GM084741-01A1 (Johnson)

08/15/2009 to 07/31/2013

NIH/NIGMS

Nucleotide selectivity and drug resistance by HIV reverse transcriptase

This project is to examine the role of enzyme structural changes in nucleotide selectivity during DNA polymerization catalyzed by HIV reverse transcriptase and to better understand the evolution of resistance to nucleoside analogs used to treat HIV infections.

TEACHING

COURSE NO.	TITLE	YEARS TAUGHT	TOTAL STUDENTS
Biochem 41	Introductory Biochemistry	1	92
Biochem 401	General Biochemistry	4	901
Biochem 425	Introductory Physical Biochemistry	3	227
Biochem 451	Senior Seminar	2	49
Biochem 503	Biochemical Problems	2	40
Biochem 525	Proteins and Enzymes	15	420
Biochem 496	Independent Study	17	38
Biochem 600	Graduate Research	17	55
Chemistry 394	Chemistry of Enzymes	14	295

Annual Kinetics Workshop:

For the past 10 years I have taught a 4-day intensive workshop on modern enzyme kinetics. With more than 300 graduates, the workshop is attended by 40-50 individuals each year with professors, graduate students and industrial research scientists in approximately equal proportions, from the US and Europe, and as far away as Russian and Malaysia. The workshop is paid for entirely by registration fees paid by the participants and with no cost to the University.

Software development:

At my own expense, I have hired programmers and worked closely with them to write a computer program for fitting kinetic data based upon computer simulation. Based upon numerical integration of rate equations, the program allows data to be fit directly to a model, bypassing the simplifying assumptions required for mathematical modeling. Licenses for a professional version of the software are offered for sale to support the programming effort. A free student version is also available at <http://www.kintek-corp.com>. The professional version is available free of charge to faculty and students of the University of Texas.

SEMINARS PRESENTED

1. Princeton University, Department of Biology. "The Mechanism of ATP Hydrolysis by Actomyosin." May 23, 1979
2. University of Guelph, Department of Chemistry. Two seminars: "Thermodynamics of Microtubule Assembly" and "The Pathway of GTP Hydrolysis During Microtubule Assembly." Dec. 1, 1980
3. Friday Harbor Washington, International Meeting on The Mechanism and Control of Ciliary Movement. "Transient-State Kinetic Analysis of the Dynein ATPase." Sept. 10, 1981
4. Worcester Foundation for Experimental Biology, Shrewsbury, MA. "The Structure of Dynein ATPase and the Mechanism of Force Production for Microtubule Sliding." Feb. 17, 1982
5. Yale University, New Haven, CT, Department of Biology. "The Structure of the Dynein ATPase and the Mechanism of Force Production for Microtubule Sliding." Feb. 19, 1982
6. University of Pennsylvania, Philadelphia, PA, Department of Biochemistry and Biophysics. "Kinetic and Structural Analysis of the Dynein ATPase." May 25, 1982
7. International Conference on Cilia and Flagella, Siena, Italy. "Structural and Mass Analysis of Dynein by Scanning Transmission Electron Microscopy." July 12, 1982
8. Max Planck Institute for Medical Research, Heidelberg, West Germany, Department of Biophysics. "Structural and Kinetic Analysis of Dynein-microtubule Complex." July 16, 1982
9. Woods Hole Marine Biological Laboratory, Woods Hole, MA. "Structural and Kinetic Analysis of Dynein." Aug. 10, 1982
10. Carnegie-Mellon University, Pittsburgh, PA. Department of Biological Sciences. "Kinetic and Structural Analysis of the Dynein-Microtubule Complex." Sept. 29, 1982
11. California Institute of Technology, Pasadena, CA, Division of Biology. "Structure and Kinetics of the Dynein ATPase." Feb. 18, 1983
12. Brandeis University, Waltham, MA. Department of Biochemistry. "Biochemistry of Dynein-microtubule Interaction." Mar. 2, 1983
13. National Institutes of Health, NIHLB, Bethesda, MD. "Structure and Kinetics of the Dynein ATPase." Sept 19, 1983
14. NICHD Testis Workshop Symposium, National Institutes of Health, Bethesda, MD. "Scanning Transmission Electron Microscopy of Dynein Arms." Invited symposium lecture. Oct. 16, 1983
15. Cytoplasmic Matrix Conference, Fogarty International Center, Bethesda, MD. "Mechanisms of Force Production for Intracellular Movements." Invited symposium lecture. Oct. 19, 1983
16. Temple University School of Medicine. "Structure and Function of Dynein, the Motor for Ciliary Movement." Mar. 21, 1984
17. Woods Hole Marine Biological Laboratory, Woods Hole, MA. "Structure of Dynein and the Mechanism of the Microtubule-Dynein ATPase." June 28, 1984
18. American Chemical Society Meeting, Philadelphia, PA. Organizer and speaker at symposium on "Protein-Macromolecule Interactions." "Structure and ATPase Mechanism of Dynein and its Role in Microtubule-Dependent Movements." Aug. 27, 1984
19. U. S.-Japan Cooperative Science Program on Fundamental Problems of Movement of Cilia, Eukaryotic Flagella and Related Systems, Hakone, Japan. "Dynein Structure and the Pathway of the Microtubule-Dynein ATPase." Sept. 7, 1984
20. Hershey Medical Center, Pennsylvania State University, Hershey, PA, Dept. of Biological Chemistry. "Structure and Mechanism of the Dynein ATPase and its Interaction with Microtubules." Sept. 24, 1984
21. Northwestern University Medical School, Dept. of Cell Biology and Anatomy, Chicago, IL. "Structure of Dynein and the Mechanism of Interaction with Microtubules." Oct. 22, 1984
22. International Chemical Congress of Pacific Basin Societies, Honolulu, HI. "Microtubule-Dynein Interactions and the Pathway of ATP Hydrolysis." Dec. 19, 1984
23. University of Pittsburgh, School of Medicine, Dept. of Biochemistry, Pittsburgh, PA. "Structure of Dynein and the Pathway of the Microtubule-Dynein ATPase." Mar. 21, 1985
24. DESY, Max-Planck-Gesellschaft, Colloquium in "Molekulare Strukturbiologie," Hamburg, West Germany. "Structure and Function of the Dynein ATPase." May 13, 1985

25. Yamada Conference on "Energy Transduction in ATPases." Kobe, Japan. "Dynein Structure and the Pathway of the Microtubule-Dynein ATPase." May 27, 1985
26. Gordon Conference on Enzymes, Coenzymes and Metabolic Pathways, Kimball Union Academy. "Dynein Structure and the Pathway of the Microtubule-Dynein ATPase." July 12, 1985
27. Princeton University, Dept. of Chemistry, Princeton, NJ. "Structure and Mechanism of the Dynein ATPase." Aug 13, 1985
28. American Society for Cell Biology Meeting, Subgroup meeting on Dynein, organized and presented paper, Atlanta, GA. Nov 17, 1985
29. Brandeis University, Dept. of Biochemistry, Waltham, MA. "Structure and Mechanism of the Dynein ATPase." Dec 4, 1985
30. SUNY-Buffalo, Cell Motility Minisymposium, Buffalo, NY. "Structure of Dynein and the Mechanism of Force Production for Microtubule-Dependent Movements." Feb 17, 1986
31. Johns Hopkins University School of Medicine, Dept. of Anatomy & Cell Biology, Baltimore, MD. "Structure of Dynein and the Mechanism of Force Production for Microtubule-Dependent Movements." Mar 4, 1986
